Aarohan Academy: Stage 2 Curriculum Framework and Grade-wise Matrix

Nursery to Class 8. Research date: 8 November 2026. Covers deliverables D, E, F and G (first part).

All activities, worksheets and examples below are original to Aarohan. Nothing is copied from textbooks or commercial worksheets. Chapter-level detail must be checked against the child's own school textbook and the NCERT contents pages before any public page is published.

1. How the sources fit together

Parents often mix up four different things. The website should keep them separate.

Layer	What it is	Examples	How Aarohan uses it
National frameworks	Policy and curriculum design, not a syllabus	NEP 2020; NCF for the Foundational Stage (launched 20 Oct 2022, ages 3 to 8); NCF-SE 2023	Shapes how and why we teach; sets stage structure
National missions	Targets for foundational skills	NIPUN Bharat: every child reads with understanding and does basic numeracy by Grade 3, with a 2026-27 target year; DIKSHA and Jadui Pitara support materials	Defines what Class 1 to 3 must secure
Board and NCERT resources	What CBSE schools are expected to follow	NCERT textbooks; CBSE circulars; CBSE Scheme of Studies 2026-27	Used to align supplementary teaching to what children meet in school

Layer	What it is	Examples	How Aarohan uses it
School-level syllabus	What an individual school chooses, with its own pace, books and tests	School term plans, workbooks, exams	Always takes priority; Aarohan follows the school's pace

Aarohan is supplementary tuition. It is not a school and has no CBSE affiliation or government endorsement.

Verified textbook names (NCERT, 2026-27)

Source: NCERT price list and book lists on ncertbooks.ncert.gov.in, plus secondary summaries, researched 8 Nov 2026. Titles marked * need a final check on ncert.nic.in.

Class	English	Hindi	Maths	Environment / Science / Social Science
1 and 2	Mridang	Sarangi	Joyful Mathematics	Early years environmental learning is integrated; title to confirm*
3	Santoor	Veena	Maths Mela	Our Wondrous World
4 and 5	Santoor*	Veena*	Maths Mela*	Our Wondrous World*
6	Poorvi	Malhar	Ganita Prakash	Curiosity (Science); Exploring Society: India and Beyond (Social Science)
7	Poorvi	Malhar	Ganita Prakash	Curiosity; Exploring Society
8	Poorvi	Malhar	Ganita Prakash (Parts 1 and 2)	Curiosity; Exploring Society (Parts 1 and 2)

Notes:

- Sources agree on the rollout: new books for Classes 1-2 (2023-24), Classes 3 and 6 (2024-25), Classes 4, 5, 7 and 8 (2025-26).
- Sources are inconsistent on some Class 4 and 5 titles. Some pages still list older Marigold and Rimjhim names, so the starred titles are unconfirmed.

- Social Science in Classes 6 to 8 is integrated (History, Geography and Civics inside one book), but Aarohan will still teach them as three strands.
- Third language (R3) enters Class 6 in 2026-27 under CBSE Circular Acad-17/2026. Aarohan will not teach R3 languages. Parents should know this.
- CBSE's Computational Thinking and AI curriculum for Classes 3 to 8 is in force for 2026-27, delivered by schools. Aarohan will offer only unplugged logic and pattern activities (see section 3).

2. Three-stage academic framework

Aarohan follows the national stage structure, with a simpler parent-friendly name for each stage.

Aarohan stage	Classes	Age (approx.)	Core purpose	Teaching style
Aarambh (Foundation)	Nursery, LKG, UKG	3 to 6	Language, number sense and fine motor readiness through play	Short sessions, hands-on, songs, stories, no pressure to write early
Aadhar (Primary)	Classes 1 to 5	6 to 11	Secure reading, writing, number sense and reasoning; build confidence	Concrete materials first, then drawings, then symbols; frequent small checks
Aagey (Middle)	Classes 6 to 8	11 to 14	Concepts, scientific and mathematical reasoning, written expression, study skills	Explain, discuss, practise, then revise; error analysis; light exam skills

The national Foundational Stage counts Nursery to Class 2 as one stage and Classes 3 to 5 as the Preparatory Stage. Aarohan keeps Classes 1 and 2 with the primary programme because most parents see them that way, but the teaching follows foundational-stage principles through Class 2.

3. Computational thinking: what Aarohan will and will not do

Sources found: CBSE launched the CT and AI curriculum for Classes 3 to 8 from 2026-27, with student and teacher handbooks on cbseacademic.nic.in. Secondary sources report 50 hours a year for Classes 3 to 5 and 100 hours for Classes 6 to 8, assessed through projects, not exams.

Recommendation (not a finding): Aarohan will include only *unplugged* computational thinking: sequencing, pattern finding, decomposition and simple logic puzzles, folded into the Weekly Brain Challenges. It will **not** advertise AI courses, coding or devices. Reasons: one classroom, no confirmed teacher training in this area, and schools already deliver the official curriculum.

---

4. Grade-wise curriculum matrix

How to read each section: items 1 to 12 follow the brief. "Aim" statements describe what the programme works toward. They are not guarantees of marks or ranks.

A. Nursery, LKG and UKG (Aarambh)

Source basis: NCF Foundational Stage 2022 (ages 3 to 8); NIPUN Bharat developmental goals; NCERT Jadui Pitara (play-based kit for the Foundational Stage).

The three years form one continuous progression. Teach the same domains at rising depth.

Domain	Nursery (about 3 to 4)	LKG (about 4 to 5)	UKG (about 5 to 6)
Listening and speaking	Name, family, simple words, rhymes	Short sentences, describe a picture, retell a very short story	Speak in 3 to 4 connected sentences, ask and answer questions
Early literacy	Recognise letters in own name; sounds of a few letters	Letter sounds for most letters; match letter to picture; blend simple sounds	Blend and read simple three-letter words; recognise early sight words; Hindi varnamala exposure

Domain	Nursery (about 3 to 4)	LKG (about 4 to 5)	UKG (about 5 to 6)
Pre-writing and fine motor	Scribble, lines, dots, clay, threading	Curves, circles, tracing letters and numbers	Form letters and numbers 1 to 20 with correct start points; copy short words
Number sense	Count to 10 with objects; more and less	Count to 20; recognise numerals; one-to-one matching	Count to 50 or more; compare numbers; add and subtract within 10 with objects
Shapes, colours, patterns	Primary colours; circle, square, triangle	Sort by colour, size and shape; simple AB patterns	ABB and ABC patterns; 2D shapes; positions (above, below, between)
Creativity and play	Free drawing, music, movement	Guided craft, role-play	Simple projects, group play with turn-taking
Environment and self	Body parts, senses	Family, community helpers, seasons	Plants, animals, safety, good habits

1. Objectives: Build confidence in a small group; enjoy sounds, stories and numbers; develop hand strength for writing; follow short instructions.

2. Subject areas: English (oral language and phonics), Hindi (swar and vyanjan exposure, rhymes), Mathematics (number readiness), Environment and Awareness, Art and Movement.

3. Topic and concept map:

- English: sounds and letters in a gentle order, rhymes, picture talk, simple vocabulary sets (family, food, animals, colours), first sight words.
- Hindi: swar introduction, common words and pictures, rhymes and songs, matra readiness later in UKG.
- Maths: counting, numeral recognition, comparison, sorting, patterns, shapes, early addition and subtraction with objects.
- Environment: self, family, plants, animals, weather, safety.

4. Foundational skills and prerequisites: Comfortable separation from parents for about an hour; basic toileting independence; ability to hold a thick crayon. Nothing else is assumed.

5. Expected competencies (aims): Say and recognise letter sounds; count objects accurately; hold a pencil with a comfortable grip; speak in simple sentences; take turns.

6. Classroom activities: Sound walk and sound-hunting around the room; sand and salt tray letter tracing; clay snakes for letter shapes; counting with buttons or pebbles; shape hunts; story circle with picture cards; movement games such as freeze and name the shape.

7. Worksheets (original, light): Dot-joining lines; trace and colour; match picture to starting sound; circle the group with more; simple pattern strips. Keep to one page and under 10 minutes.

8. Reading, writing, speaking, reasoning: Picture reading; "what happens next" questions; rhyme completion; sorting games with a "why did you put it there?" question.

9. Common gaps and misconceptions: Writing pressure before hand strength; reversing letters (b/d, 6/9), which is normal at this age; confusing counting words with quantity; reciting numbers without matching objects.

10. Assessment: Observation checklists, a simple sounds and numbers check at entry, and a short termly review. No marks and no tests.

11. Parent support: Ten minutes of rhymes or picture reading daily; counting steps and fruit; let children scribble and colour freely; do not force neat writing.

12. Aim: Child recognises most letter sounds and numerals to 20, holds a pencil comfortably, speaks in short sentences and enjoys coming to class.

B. Class 1

Source basis: NCERT Mridang (English), Sarangi (Hindi), Joyful Mathematics; NIPUN Bharat Grade 1 targets; NCF-FS.

1. Objectives: Read simple sentences, write letters and short words legibly, build number sense to 99, enjoy stories.

2. Subject areas: English, Hindi, Mathematics, Environmental awareness.

3. Topic and concept map:

- English: phonics with blending, short vowel words, sight words, simple sentences, naming words and doing words in context, picture-based writing.
- Hindi: varnamala fluency, simple matras, two- and three-letter words, short sentences, rhymes and stories.
- Maths: numbers to 99, place value (tens and ones), comparing and ordering, addition and subtraction within 20, shapes, patterns, length and weight by direct comparison, time basics (days of the week), money awareness.
- Environment: family, food, plants, animals, water, safety.

4. Prerequisites: Letter sounds, counting to 20, holding a pencil, listening to a short story.

5. Competencies (aims): Read a short text aloud with reasonable accuracy; write 3 to 4 simple sentences with guidance; count, compare and add within 20 with materials; identify tens and ones.

6. Activities: Sound blending with cards; word-building with letter tiles; bundling sticks into tens; number line hops; shopkeeper game with play coins; picture sequencing and retelling.

7. Worksheets: Blend and read; fill the missing letter; write a sentence about a picture; tens-and-ones boxes; story sums with pictures; pattern completion.

8. Language and reasoning: Daily oral reading with partner; "tell me a sentence about this picture"; "how did you get that answer?" after every sum.

9. Gaps and misconceptions: Guessing words from pictures instead of decoding; treating 10 as ten separate ones; reversing digits (12 as 21); confusing addition and subtraction symbols; unclear matra placement in Hindi.

10. Assessment: Weekly one-minute reading checks, number-sense interviews, handwriting samples compared termly, short oral quizzes.

11. Parent support: Read together for 10 minutes; ask your child to explain a sum aloud; practise writing the child's own name and a few words neatly; use everyday money and counting.

12. Aim: Fluent decoding of simple text, secure place value to 99, and neat, legible handwriting by year end.

C. Class 2

Source basis: NCERT Mridang, Sarangi, Joyful Mathematics; NIPUN Bharat Grade 2 targets.

1. Objectives: Read with growing fluency and understanding, write short paragraphs, compute confidently within 100, begin simple reasoning.

2. Subject areas: English, Hindi, Mathematics, Environmental awareness.

3. Topic and concept map:

- English: phonics review, longer words, comprehension of short passages, naming, action and describing words in context, simple punctuation, picture and prompt writing.
- Hindi: all matras, reading short passages, simple grammar through use, dictation of familiar words, short writing.
- Maths: numbers to 999 introduced, place value, addition and subtraction with and without regrouping, introduction to multiplication as repeated groups, shapes and symmetry basics, length, weight and capacity, time (hours, half hours), money, simple data (picture graphs).
- Environment: home and neighbourhood, transport, seasons, living and non-living, simple mapping of the way to school.

4. Prerequisites: Class 1 phonics, counting and place value to 99, basic add and subtract within 20.

5. Competencies (aims): Read a 6 to 8 line passage and answer who, what, where questions; write a short paragraph of 4 to 5 sentences; add and subtract two-digit numbers; count in 2s, 5s and 10s.

6. Activities: Partner reading; story maps; place-value mat with counters; skip-counting on number charts; measurement with hand-spans and strings; class picture graph of favourites; neighbourhood mapping walk.

7. Worksheets: Short passage with questions; sentence building; regrouping practice with visual support; story sums; measure and record; read the picture graph.

8. Language and reasoning: Retell in own words; explain a subtraction in a sentence; compare two methods for the same sum.

9. Gaps and misconceptions: Subtracting smaller digit from larger regardless of position; confusing tens and ones when regrouping; reading words without understanding; limited vocabulary.

10. Assessment: Passage fluency and comprehension check each month, place-value check, error-pattern notes, short writing sample.

11. Parent support: Let your child read to you and ask one question afterwards; use real prices and distances for sums; encourage a few lines of daily writing in a journal.

12. Aim: Read with understanding, add and subtract two-digit numbers accurately, and write a short paragraph independently.

D. Class 3

Source basis: NCERT Santoor (English), Veena (Hindi), Maths Mela, Our Wondrous World; NIPUN Bharat Grade 3 target, the point by which children are expected to read to learn.

1. Objectives: Make Class 3 the secure launch point for independent reading, multi-digit arithmetic and curiosity about the world.

2. Subject areas: English, Hindi, Mathematics, EVS (Our Wondrous World), and light logic puzzles.

3. Topic and concept map:

- English: fluent reading, comprehension of stories and simple non-fiction, nouns, verbs, adjectives and simple tenses through use, sentence and paragraph writing, vocabulary and dictionary skills.
- Hindi: fluent reading, vocabulary, simple grammar (sangya, kriya, visheshan) through examples, short paragraphs, letters and dictation.
- Maths: numbers to 9999, addition and subtraction with regrouping, multiplication tables, introduction to division as sharing and grouping, fractions as parts of a whole (halves, quarters), length, weight, capacity, time, money, 2D and 3D shapes, simple data.
- EVS: living things, food, water, shelter, travel, community, simple observation and recording.

4. Prerequisites: Class 2 reading fluency, two-digit add and subtract, skip counting.

5. Competencies (aims): Read a short story independently and answer literal and inferential questions; write a 6 to 8 line paragraph; know tables to 10; solve one-step word problems; read simple pictographs.

6. Activities: Reading aloud with expression; paragraph building from picture prompts; array and grid models for multiplication; fraction paper folding; measure classroom objects; plant growth diary; weather chart.

7. Worksheets: Passage with literal and why questions; edit the sentence; regrouping practice; table patterns; share equally problems; observation sheet for a plant or object.

8. Language and reasoning: Explain why an answer must be right; find the odd one out; compare two solution routes; think-aloud problem solving.

9. Gaps and misconceptions: Memorising tables without meaning; thinking a larger denominator means a larger fraction; confusing perimeter with area later; reading aloud correctly but not understanding; Hindi grammar learned as rules without use.

10. Assessment: Monthly reading check, tables fluency check, a short written task, a concept quiz with explanation questions, one growth note per child each month.

11. Parent support: Practise tables in the kitchen or during walks; read a short story together; ask your child to teach you something from school.

12. Aim: Independent reading with understanding, confident use of the four operations in simple problems, and clear short writing.

E. Class 4

Source basis: NCERT Class 4 books (titles to be confirmed on ncert.nic.in); NCF-SE 2023 Preparatory Stage.

1. Objectives: Deepen comprehension, grammar and writing; extend arithmetic to larger numbers; start reasoning with data and measurement.

2. Subject areas: English, Hindi, Mathematics, EVS.

3. Topic and concept map:

- English: longer passages, inference, tenses, prepositions, conjunctions, paragraph and short letter writing, vocabulary through context.
- Hindi: comprehension, grammar (vachan, ling, kaal introduced through use), vocabulary, letters, short essays.
- Maths: five-digit numbers, place value, four operations, multiplication with two digits, division with remainders, fractions on a number line and equivalent fractions, factors and multiples (introductory), perimeter, area of simple figures by counting squares, angles and lines, time and calendar, data in bar graphs.
- EVS: food and health, environment, water, natural resources, simple maps and directions.

4. Prerequisites: Class 3 fluency in tables, regrouping and short writing.

5. Competencies (aims): Infer meaning from a passage; write a structured paragraph and an informal letter; multiply and divide with confidence; compare and order common fractions; read and make a simple bar graph.

6. Activities: Role-play of a story scene; fraction strips and number-line cards; area on grid paper; measurement project; class survey with bar graph; direction and map games.

7. Worksheets: Inference questions; grammar in context; long multiplication with place-value support; fractions on a number line; area and perimeter grid tasks; graph reading.

8. Language and reasoning: Say why a conclusion follows from the text; estimate before calculating; spot the mistake in a worked sum.

9. Gaps and misconceptions: Division procedure without understanding; confusing equivalent fractions with equal numbers; mixing area and perimeter; copying text lines as answers instead of answering in own words.

10. Assessment: Monthly concept checks, a written paragraph assessed against a simple rubric, error analysis, reading fluency note.

11. Parent support: Ask for estimates in daily life (shopping totals, travel time); ask your child to summarise a story in three sentences; check homework by asking "how did you work it out?".

12. Aim: Better written answers in own words, secure multiplication and division, and accurate fraction thinking.

F. Class 5

Source basis: NCERT Class 5 books (titles to be confirmed); NCF-SE Preparatory Stage; NIPUN Bharat aims for sustained foundational skills by Grade 5.

1. Objectives: Consolidate primary skills so Class 6 is not a shock; build fluency with fractions, decimals and measurement; strengthen writing.

2. Subject areas: English, Hindi, Mathematics, EVS.

3. Topic and concept map:

- English: comprehension (literal, inferential), grammar (tenses, articles, prepositions, simple clauses), paragraph, letter and story writing, vocabulary and word roots, reading for pleasure.
- Hindi: comprehension, grammar through use, letters, paragraph and story writing, vocabulary.
- Maths: large numbers (lakhs and crores in the Indian system), four operations, factors, multiples, fractions (add and subtract like fractions), decimals (tenths and hundredths) and money, perimeter and area, volume and capacity (introductory), angles, symmetry, patterns, averages (introductory), data tables and graphs.

- EVS: ecosystems, health and hygiene, resources, safety, simple environmental projects.

4. Prerequisites: Class 4 multiplication and division, understanding of fractions as parts.

5. Competencies (aims): Solve two-step word problems; add and subtract fractions with like denominators; read and write decimals to hundredths; write a clear letter and a short story with a beginning, middle and end; plan a small project.

6. Activities: Fraction and decimal on a shared number line; shop-and-change role play; area and perimeter design of a garden plot; reading circle with summary talk; class debate with simple rules; mini project with questions, observation and a short report.

7. Worksheets: Two-step problems with a worked model; decimals and money; fraction bar models; comprehension with inference; letter and story frames; data from a self-made table.

8. Language and reasoning: Justify with a sentence using "because"; plan a story before writing; compare two fractions and explain.

9. Gaps and misconceptions: Treating decimals as two separate whole numbers (0.5 vs 0.25); adding numerators and denominators; shallow story writing with no structure; weak reading stamina.

10. Assessment: Two-step problem checks, monthly writing sample with a rubric, an end-of-term review, a short bridge check before Class 6.

11. Parent support: Encourage reading longer texts for 15 minutes; use cooking and shopping for fractions and decimals; help your child plan, not do, the project.

12. Aim: Fluency with whole numbers, early fractions and decimals, and well-organised writing, as preparation for middle school.

G. Class 6

Source basis: NCERT Poorvi (English), Malhar (Hindi), Ganita Prakash (Maths), Curiosity (Science), Exploring Society: India and Beyond (Social Science); CBSE R3 introduced in 2026-27 (Acad-17/2026); NCF-SE Middle Stage.

1. Objectives: Make the move from primary to middle school smooth; build reasoning, not just procedures; start disciplined study habits.

2. Subject areas: Mathematics, Science, English, Hindi, Social Science (History, Geography, Civics strands).

3. Topic and concept map:

- Maths: patterns and number play, whole numbers, factors, multiples and primes, fractions and decimals, basic geometry (lines, angles, shapes, symmetry), constructions with compass and ruler, perimeter and area, data handling, an introduction to integers and simple algebra thinking.
- Science: sorting and classifying materials, living and non-living things, the body and health, plants and their parts, motion and measurement, light, electricity basics, natural phenomena. Taught through observation and simple experiments.
- English: reading varied texts, comprehension, grammar through use, paragraph, letter and story writing, vocabulary.
- Hindi: comprehension, grammar (sandhi, samas introduced gently), letters, essays, vocabulary.
- Social Science: early India and sources of history, maps and globe, latitudes and longitudes introduction, landforms, local governance and community life.

4. Prerequisites: Class 5 fractions and decimals, multiplication and division fluency, paragraph writing, ability to read a map key.

5. Competencies (aims): Explain reasoning in maths; plan and record a simple science experiment; write structured paragraphs; read and label a basic map.

6. Activities: Number-pattern investigations; fraction walls; angle-making with strips; sorting and classifying classroom materials; a seed germination record; map reading with a key; timeline of a family or local history.

7. Worksheets: Reasoning tasks with "explain why"; prime and factor grids; fraction-decimal conversion tables; classification sheets; map marking tasks; short-answer practice with a model answer.

8. Language and reasoning: Write the steps of a method in your own words; predict, test, record and explain in science; use evidence from a source in history.

9. Gaps and misconceptions: Seeing maths as rule-following; multiplying always makes bigger; weak notes-making; misreading map scale; copying textbook lines in answers.

10. Assessment: Short unit checks, mistake logs, a monthly reasoning task, a notebook and diagram check, light test practice in the second half of the year.

11. Parent support: Ask your child to explain one concept each week; help build a simple routine and quiet study corner; check notes and diagrams, not only answers.

12. Aim: More confident reasoning in maths, clearer science explanations, and better organised written answers.

H. Class 7

Source basis: NCERT Ganita Prakash (Parts 1 and 2), Curiosity, Exploring Society (Parts 1 and 2), Poorvi, Malhar.

1. Objectives: Build algebraic and scientific thinking; strengthen analysis in social science; improve written expression.

2. Subject areas: Mathematics, Science, English, Hindi, Social Science.

3. Topic and concept map:

- Maths: integers, fractions and decimals operations, ratio and proportion, algebraic expressions and simple equations, lines and angles, triangle properties, congruence (introductory), perimeter and area, data handling and mean, symmetry, exponents (introductory).
- Science: nutrition in plants and animals, acids and bases, heat, motion, electricity, weather and climate, soil, water, light, respiration, transport in living things. Emphasis on observation, variables and recording.
- English: comprehension, grammar in use (tenses, voice, reported speech introduced), letters, notices, paragraph writing, summary skills.
- Hindi: comprehension, grammar (ras, alankar introduced simply), essay and letter writing.
- Social Science: medieval India as a theme, regional development, resources, maps and scale, rights and democracy basics.

4. Prerequisites: Class 6 fractions, area, basic geometry; note-making habits.

5. Competencies (aims): Form and solve one-step equations; reason about ratios; design a fair test in science; compare sources in history; write a short summary.

6. Activities: Algebra tiles or paper models; ratio recipes; fair-test investigations (e.g. how temperature affects dissolving); climate data reading; map scale exercises; source comparison tasks.

7. Worksheets: Equation-building from stories; ratio word problems; lab-style observation sheets; data tables from weather records; source-based questions with model answers.

8. Language and reasoning: Justify each algebra step; "what would change if..." questions in science; evaluating two viewpoints in civics.

9. Gaps and misconceptions: Treating letters in algebra as labels not numbers; confusing ratio with fraction; thinking a bigger sample means no need for controls; memorising dates without context.

10. Assessment: Concept quizzes with explanation, a science practical-style record, a written answer rubric, test practice once per term.

11. Parent support: Ask your child to explain steps aloud; discuss news with maps; support routine and sleep; avoid last-minute cramming.

12. Aim: Confident algebraic thinking, clearer scientific explanations and stronger structured answers.

I. Class 8

Source basis: NCERT Ganita Prakash (Parts 1 and 2), Curiosity, Exploring Society (Parts 1 and 2), Poorvi, Malhar. CBSE school exams only; no board exam until Class 10.

1. Objectives: Strengthen foundations for Classes 9 and 10; build exam-writing and revision skills; deepen reasoning and analysis.

2. Subject areas: Mathematics, Science, English, Hindi, Social Science.

3. Topic and concept map:

- Maths: rational numbers, linear equations, quadrilaterals and understanding shapes, squares and square roots, cubes, exponents and powers, percentages, profit and loss, simple and compound interest (introductory), algebraic identities, mensuration (area and volume), data handling and probability, factorisation, graphs.
- Science: crop production and microorganisms, force and pressure, friction, sound, chemical effects of electric current, combustion, cell structure, reproduction, adolescence, light, natural resources.
- English: comprehension, grammar for writing (voice, speech, clauses), formal and informal letters, notices, summaries, essay and story writing.
- Hindi: comprehension, grammar (sandhi, samas, muhavare), letter and essay writing, vocabulary.
- Social Science: colonial India and the independence movement as a theme, resources and agriculture, industries, the Constitution, rights, the judiciary, map interpretation.

4. Prerequisites: Class 7 integers, ratio, basic algebra; science observation habits.

5. Competencies (aims): Solve linear equations and word problems; apply identities; explain a science concept with a diagram; analyse a primary source; write well-structured formal letters and short essays.

6. Activities: Algebra proofs with area models; percentage and interest from real receipts; probability experiments with coins or dice; science concept maps; timeline and cause-effect charts; mock writing tasks with peer review.

7. Worksheets: Graded algebra sets; mensuration problems with diagrams; case-study science questions; source-based history questions; map interpretation; mixed revision sets.

8. Language and reasoning: Written proofs; "why is this answer wrong?" tasks; paragraph-argument in civics; reading graphs for conclusions.

9. Gaps and misconceptions: Expanding $(a+b)^2$ wrongly; mixing area and volume units; weak diagram labelling; memorising answers without understanding; poorly planned essays.

10. Assessment: Unit tests with error analysis, practice papers matched to school format, an answer-writing rubric, one diagnostic Class 9 readiness check in the last term.

11. Parent support: Support a steady revision timetable; avoid comparing marks with other children; help with sleep and screen limits; talk about what is hard.

12. Aim: Stronger conceptual understanding, steadier problem solving and more confident exam writing, ready for the step up to Class 9.

---

5. Recommended enrichment programmes

Every programme below is a recommendation from the research, sized for one classroom and a family teaching team. "Launch" means ready at opening; "Phase 2" means within about six months.

Programme	Educational value	Effort	Content needed	When
Entry learning check (per child)	Finds gaps early; gives the parent a clear starting point	Low	One short check per stage (about 15 to 20 minutes)	Launch

Programme	Educational value	Effort	Content needed	When
Personalised learning goals	Keeps teaching focused on 2 to 3 goals per child	Low	A one-page goal sheet	Launch
Monthly growth note	Shows progress in plain language, without ranks	Medium	A template plus 5 minutes per child per month	Launch
Weekly short report	Fast feedback, but heavy for one teacher	Medium to high	Tick-box sheet, shared on WhatsApp	Phase 2
Reading improvement programme	Fluency is the biggest lever for Classes 1 to 5	Medium	Graded reading passages (original) and a fluency log	Launch for Classes 1 to 3; Phase 2 for the rest
Mental maths (10 minutes a day)	Builds number sense and speed with understanding	Low	Daily sets by class	Launch
Handwriting development	Helps legibility and exam presentation	Low	Letter and number formation sheets	Launch for Nursery to Class 3
Vocabulary challenges	Supports English and Hindi writing	Low	Weekly word sets and games	Launch
Science observation activities	Builds inquiry skills for Classes 3 to 8	Medium	Safe, low-cost activities	Phase 2
Study skills and exam preparation	Notes, revision plans, answer writing for Classes 6 to 8	Medium	A short skills course and checklists	Phase 2
General knowledge quizzes	Engages older children; low priority academically	Low	Quizzes with verified answers	Later

Programme	Educational value	Effort	Content needed	When
Parent education resources	Helps parents support home learning	Low	Short guides in English and Hindi	Launch (3 to 5 guides)
Progress dashboard	Looks modern but adds privacy and maintenance burden	High	Software, data protection steps	Later, only if needed

A dashboard is not recommended at launch. A simple monthly growth note and a WhatsApp message to the parent give most of the value at far lower cost and lower privacy risk.

6. Aarohan Growth Journey (draft concept)

A parent-facing way to explain how a child grows from Nursery to Class 8. Each stage has one headline, one promise and three "signs of growth".

Stage	Headline	What we work on	Signs of growth a parent can see
Aarambh (Nursery to UKG)	I love to learn	Sounds, counting, hand skills, speaking	Child asks for stories; recognises letters and numbers; holds a pencil comfortably
Aadhar (Classes 1 to 2)	I can read and count	Fluent reading, writing, place value	Reads short books aloud; writes simple sentences; explains a sum
Aadhar (Classes 3 to 5)	I can think and explain	Comprehension, fractions, writing, projects	Answers in own words; solves two-step problems; finishes a small project
Aagey (Classes 6 to 8)	I can reason and revise	Reasoning, scientific inquiry, study skills	Explains concepts; keeps tidy notes; plans revision

This should be drawn as a simple path or staircase on the website.

7. Aarohan Learning Library: 30 original resources

Design notes (apply to all):

- Each resource is one A4 page, black-and-white friendly, with a large title, a short instruction box in English and Hindi, and a small "For parents" box.
- Answer keys are written by the teaching team and checked by a second person before publishing. No unverified answers.
- Early resources use big print and plenty of space; older resources use clean grids.
- File names follow the pattern class-subject-topic-level, for example `class3-maths-fractions-easy.pdf`. Each PDF has a clear title and text that screen readers can read.
- Filters: class, subject, topic, difficulty (Start, Build, Challenge).
- No children's names, photos or results appear in any resource.

#	Title	Class	Subject	Learning objective	Format
1	Alphabet Sound Hunt	Nursery to LKG	English	Link letters to their sounds	Picture match page
2	Trace and Play: Lines and Curves	Nursery	Pre-writing	Build hand control	Tracing page
3	My First Sight Words	LKG to UKG	English	Recognise 10 to 15 common words	Cut-out cards

#	Title	Class	Subject	Learning objective	Format
30	Linear Equations from Stories	Class 7 to 8	Maths	Form and solve one-variable equations	Story problems

Suggested launch order: resources 1 to 10 first (Foundation and Class 1), then 11 to 20, then 21 to 30.

8. Items that need confirmation before publishing

- Final NCERT titles and chapter lists for Classes 4 and 5, checked on ncert.nic.in.
- Whether Aarohan will teach Sanskrit or third languages (not planned).
- Teachers' own subject strengths, so the matrix is matched to what the team can truly deliver, especially Classes 6 to 8.
- Which schools the families attend, because school pacing overrides this matrix.
- A teacher or qualified reviewer to check every worksheet answer key.

9. Sources used in this stage

- NCERT book price list and class lists: ncertbooks.ncert.gov.in
- NCF for the Foundational Stage and NIPUN Bharat summaries: dsel.education.gov.in, pib.gov.in, eparlib.sansad.in
- CBSE R3 circular Acad-17/2026 and CT and AI page: cbseacademic.nic.in
- Rollout summaries for new NCERT textbooks: anantamias.com, bookmandee.com, aglasem.com (secondary sources; verify before publishing)
